I am a full-stack software developer with over 2 years of experience and counting. During this time, I have honed my skills and expertise in a variety of technologies. I have not only found several relevant technologies but have also worked extensively with them. Below is a list of these technologies, and I am fully capable of delivering results using them

TECHNOLOGIES

- React Js
- UI/UX
- Typescript
- Redux
- React Hooks[web hooks]
- Nodejs
- Express Framework
- GraphQL
- MongoDB
- Postgresql
- NocoDB
- Javascript
- Aws
- Heroku

EXPERIENCE

Decagon - Software Engineer

1. Developed software using the MERN stack (MongoDB, Express.js, React.js, Node.js).
2. Worked on projects involving Node.js REST API and view templating engine with Express.
3. Collaborated with Decagon to enhance and scale your skills.

Dates: Date: "2022 till date"

Alusoft - Instructor

1. Taught HTML, CSS, and JavaScript to students.

2. Worked on projects during your time at Alusoft.

Date: 2021-2022

Penciledge

I worked at Penciledge as a Mid-Level Software Engineer, where I served as a frontend developer using React.js, focusing on performance optimization, responsiveness, state management, and enhancing component reusability while refactoring monolithic code.

PROJECTS [FRONTEND]

NETFLIX CLONE

I developed this project using pure React js and its hooks with scss no external libraries were used. I also have an Admin UI that would be used by the admin to perfrom CRUD

https://github.com/lotodee/NETFLIXs-UI

FIVERR CLONE

I developed a fivver clone using React js, scss and , react Hooks i used Carousel for sliders as an external library for this project

https://github.com/lotodee/FIVERRs-UI

PROJECTS [BACKEND]

NETFLIX-CLONE-APP API

 An api for netflix clone using NODEjs , MONGODB , Express and other libraries imported to make this work.

https://github.com/lotodee/NETFLIXs-UI

E-commerce Online App

Built an online app using React, Node.js, MongoDB, and Express.The wabasic s designed using the
